# WhatsApp Bot

This is a basic starter WhatsApp bot project.

## How to Run
```bash
node index.js
```
```

index.js

```javascript
// Basic WhatsApp Bot starter using baileys or venom (example)
console.log("Bot is starting...");

// Here you would add code to initialize the bot, e.g. using baileys or venom-bot
```

package.json

```json
{
  "name": "whatsapp-bot",
  "version": "1.0.0",
  "description": "Basic WhatsApp bot starter project",
  "main": "index.js",
  "scripts": {
    "start": "node index.js"
  },
  "author": "magsrg",
  "license": "MIT"
}
```

plugins/menu.js

```javascript
// Sample .menu command plugin
module.exports = {
    command: 'menu',
    description: 'Shows menu',
    handler: async () => {
        return `*BOT MENU*\n- .menu\n- .ping\n- .about`;
    }
};
```

plugins/ping.js

```javascript
// Sample .ping command plugin
module.exports = {
    command: 'ping',
    description: 'Checks bot status',
    handler: async () => {
        return 'pong!';
```

```
    }
};
```

plugins/about.js

```
// Sample .about command plugin
module.exports = {
    command: 'about',
    description: 'Shows bot info',
    handler: async () => {
        return `*About Bot*\nName: CYPHER-X Clone\nVersion: 1.0.0\nDeveloper: magsrg`;
    }
};
```
